To Whom It May Concern,

In the past few weeks I have visited many business, churches and people. I was trying to deliver my business card because I thought I could help as a counselor to some people. I realize that some may think I will be replacing their teachings and programs. I think that this is just opposite to the truth. I believe my subconscious analysis is not to replace, but to only be a tool to support it as I would love to talk to you to see if this is so.

I'm writing to you to introduce, what I think is, a way to access the subconscious and is only a matter of time before this will be accepted as a valid way to do so. If one is able to listen to their backwards audio while also believing in its theory and then that this has a usefulness then they can contemplate information from their higher self that can change their bad behaviors or habits to become more successful in life. If parents to a child, for example, know that their child is not learning well then my subconscious analysis can attempt to open, to the child with the parents consent, the higher self.

The higher self can offer insights and tips as to what is going wrong or right. If this child can also listen and hear these metaphor and story-lines themselves then it will be conformation from the subconscious that they are connected to a higher self and this information can be a help with their conscious understanding of what they are doing and to be more self aware. Increasing self awareness is the key to increasing the likelihood one is able to surmount a problem or complete a goal. Problems can be solved and goals won by understanding the end state and this is what the subconscious can reveal.

I look forward to finding [No longer doing this]
describing what topics or interests they are concerned with. Then taking this [No longer doing this]
] while then identifying the insights from the subconscious.
[No longer doing this] it
that way. I could also [No longer doing this]

From the thoughts of,
Matt Mandell
